

National Science Foundation

§ 689.3

whether an allegation or apparent instance of research misconduct has substance and if an investigation is warranted. An investigation must be undertaken if the inquiry determines the allegation or apparent instance of research misconduct has substance. An “investigation” is a formal development, examination and evaluation of a factual record to determine whether research misconduct has taken place, to assess its extent and consequences, and to evaluate appropriate action.

(c) A finding of research misconduct requires that—

(1) There be a significant departure from accepted practices of the relevant research community; and

(2) The research misconduct be committed intentionally, or knowingly, or recklessly; and

(3) The allegation be proven by a preponderance of evidence.

(d) Before NSF makes any final finding of research misconduct or takes any final action on such a finding, NSF will normally afford the accused individual or institution notice, a chance to provide comments and rebuttal, and a chance to appeal. In structuring procedures in individual cases, NSF may take into account procedures already followed by other entities investigating or adjudicating the same allegation of research misconduct.

(e) Debarment or suspension for research misconduct will be imposed only after further procedures described in applicable debarment and suspension regulations, as described in §§ 689.8 and 689.9, respectively. Severe research misconduct, as established under the regulations in this part, is an independent cause for debarment or suspension under the procedures established by the debarment and suspension regulations.

(f) The Office of Inspector General (OIG) oversees investigations of research misconduct and conducts any NSF inquiries and investigations into suspected or alleged research misconduct.

(g) The Deputy Director adjudicates research misconduct proceedings and the Director decides appeals.

(h) Investigative and adjudicative research misconduct records maintained by the agency are exempt from public

disclosure under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a) to the extent permitted by law and regulation.

§ 689.3 Actions.

(a) Possible final actions listed in this paragraph (a) for guidance range from minimal restrictions (Group I) to the most severe and restrictive (Group III). They are not exhaustive and do not include possible criminal sanctions.

(1) *Group I actions.* (i) Send a letter of reprimand to the individual or institution.

(ii) Require as a condition of an award that for a specified period an individual or institution obtain special prior approval of particular activities from NSF.

(iii) Require for a specified period that an institutional official other than those guilty of misconduct certify the accuracy of reports generated under an award or provide assurance of compliance with particular policies, regulations, guidelines, or special terms and conditions.

(2) *Group II actions.* (i) Totally or partially suspend an active award, or restrict for a specified period designated activities or expenditures under an active award.

(ii) Require for a specified period special reviews of all requests for funding from an affected individual or institution to ensure that steps have been taken to prevent repetition of the misconduct.

(iii) Require a correction to the research record.

(3) *Group III actions.* (i) Terminate an active award.

(ii) Prohibit participation of an individual as an NSF reviewer, advisor, or consultant for a specified period.

(iii) Debar or suspend an individual or institution from participation in Federal programs for a specified period after further proceedings under applicable regulations.

(b) In deciding what final actions are appropriate when misconduct is found, NSF officials should consider:

(1) How serious the misconduct was;

(2) The degree to which the misconduct was knowing, intentional, or reckless;

§ 689.4

45 CFR Ch. VI (10–1–07 Edition)

(3) Whether it was an isolated event or part of a pattern;

(4) Whether it had a significant impact on the research record, research subjects, other researchers, institutions or the public welfare; and

(5) Other relevant circumstances.

(c) Interim actions may include, but are not limited to:

(1) Totally or partially suspending an existing award;

(2) Suspending eligibility for Federal awards in accordance with debarment-and-suspension regulations;

(3) Proscribing or restricting particular research activities, as, for example, to protect human or animal subjects;

(4) Requiring special certifications, assurances, or other, administrative arrangements to ensure compliance with applicable regulations or terms of the award;

(5) Requiring more prior approvals by NSF;

(6) Deferring funding action on continuing grant increments;

(7) Deferring a pending award;

(8) Restricting or suspending participation as an NSF reviewer, advisor, or consultant.

(d) For those cases governed by the debarment and suspension regulations, the standards of proof contained in the debarment and suspension regulations shall control. Otherwise, NSF will take no final action under this section without a finding of misconduct supported by a preponderance of the relevant evidence.

§ 689.4 Role of awardee institutions.

(a) Awardee institutions bear primary responsibility for prevention and detection of research misconduct and for the inquiry, investigation, and adjudication of alleged research misconduct. In most instances, NSF will rely on awardee institutions to promptly:

(1) Initiate an inquiry into any suspected or alleged research misconduct;

(2) Conduct a subsequent investigation, if warranted;

(3) Take action necessary to ensure the integrity of research, the rights and interests of research subjects and the public, and the observance of legal requirements or responsibilities; and

(4) Provide appropriate safeguards for subjects of allegations as well as informants.

(b) If an institution wishes NSF to defer independent inquiry or investigation, it should:

(1) Complete any inquiry and decide whether an investigation is warranted within 90 days. If completion of an inquiry is delayed, but the institution wishes NSF deferral to continue, NSF may require submission of periodic status reports.

(2) Inform OIG immediately if an initial inquiry supports a formal investigation.

(3) Keep OIG informed during such an investigation.

(4) Complete any investigation and reach a disposition within 180 days. If completion of an investigation is delayed, but the institution wishes NSF deferral to continue, NSF may require submission of periodic status reports.

(5) Provide OIG with the final report from any investigation.

(c) NSF expects institutions to promptly notify OIG should the institution become aware during an inquiry or investigation that:

(1) Public health or safety is at risk;

(2) NSF's resources, reputation, or other interests need protecting;

(3) There is reasonable indication of possible violations of civil or criminal law;

(4) Research activities should be suspended;

(5) Federal action may be needed to protect the interests of a subject of the investigation or of others potentially affected; or

(6) The scientific community or the public should be informed.

(d) Awardee institutions should maintain and effectively communicate to their staffs appropriate policies and procedures relating to research misconduct, which should indicate when NSF should be notified.

§ 689.5 Initial NSF handling of misconduct matters.

(a) NSF staff who learn of alleged misconduct will promptly and discreetly inform OIG or refer informants to OIG.

(b) The identity of informants who wish to remain anonymous will be kept
